PROTECTION AND CONTROL WITH IEC 61850

3 DAYS SEMINAR WITH PRACTICAL DEMONSTRATIONS

PRAGUE, CZECH REPUBLIC, DECEMBER 8TH – 10TH

With focus on protection and control in HV/MV substations
using GOOSE, SV, SCADA and SCL Language

The IEC 61850 standard has been applied for several years to many new substation designs all over the world. It provides a compact solution, flexibility in engineering and installation and interoperability between devices from different manufacturers.

During the seminar, truly experienced engineers will help you to see and understand how use the core parts of the IEC 61850 standard are applied in substation design, engineering, configuration, communication methods for real-time information exchange, monitoring, protection and control applications. You will learn crucial lessons learned since the first projects with IEC 61850 in 2004.

Seminar content:

- IEC 61850 Introduction (Edition 1, 2, and 2.1) and experience after 10 years in operation. Where are we today?
- Return of experience, applications and practical demonstrations:
 - Protection and Control in Substation Automation
 - Engineering and Configuration
 - Maintenance
 - Monitoring and SCADA system

All Presentations will be supported by practical examples or demonstrations.

Program:

Day 1 - IEC 61850 Introduction and experience after 10 years in operation. Where are we today?

Objectives:

- Introduction of basic concepts (information modeling, information models, information exchange, system configuration)
- Explanation of the different parts of the standard, the mapping (Logical Nodes, Logical Devices...), SCL language, types of SCL files, type of IEC 61850 documents (PICS, PIXIT...).
- Information on Client/Server (ACSI/MMS), Sample Values and GOOSE.

- IEC 61850 Edition 1, Edition 2, and Edition 2.1...What are they? What are the main improvements?
- Ten years of Experience with IEC 61850: Lessons learned.

- Impact of IEC 61850 standard on equipment and tools like Protection and Control Devices (IED), Merging Units, Test equipment, design, configuration, SCADA.

FMTP POWER & NETTEDAUTOMATION

Day 2 & Day 3 - Return of experience, applications and practical demonstrations:

Objectives:

- Substation automation protection and control philosophy, vertical (MMS) and horizontal communication (GOOSE, SV), protection schemes, interlocking.
- Real time performances, protection security and dependability with GOOSE and conventional technologies.
- Different types of GOOSE messages for different types of "substation signals"
- Types of Network topology (Ring or redundant with PRP, HSR)
- Engineering process, Bottom-Up, Top-Down – Where are we now? What to expect?

- Process Bus (sampled values) today and expectations for the future. Interoperability, responsibility and testability. The role of different IEC groups: IEC TC 57 (Power systems management and associated information exchange), TC 95 (Measuring relays and protection equipment) and TC 38 (Instrument transformers).

- Interoperability in substations: What we have done so far, which types of problems have been met and the solutions to find them and fix them. Turn-key vs multi-vendor projects.
- Which kind of test equipment are available, test tools, how to use them. PROs and CONS (Testing protection and interlocking (GOOSE)).

- Network analysis and Testing Client/Server Publisher/Subscriber
- Vertical communication, "engineering of SCADA System"
- Station HMI (SCADA, RTU, ..)
- Communication between substations and remote control center (IEC 60870-5-104, DNP3,)
- Importance of event driven reporting
- Signal list to the SCADA System. Report Control blocks.
- How to build and configure Gateways from IEC 61850 to IEC 60870-5-104

Practical demonstration on Protection device

- Example of configuration and testing of a simple protection IED for IEC 61850 GOOSE application.

Practical demonstration on a simple SCADA configuration

- Examples of Implementation, configuration and use case on SCADA System (Client) / IED Protection and Monitoring IED (Servers).
A demo software for client/server and publisher/subscriber (running on Windows) will be provided for every attendee.

Who should attend?

- Protection and Electrical Engineers (protection, control, engineering, SCADA, asset managers, ...)
- System integrators
- Product managers of vendors
- R&D engineers
- Maintenance personnel
- Experts responsible for network infrastructure

FMTP POWER & NETTEDAUTOMATION

The Experts teaching

FMTP Power AB – Mr. Andrea Bonetti

Our expert Andrea Bonetti, was born in Bergamo, Italy, 1966. He graduated in electrical engineering (MSEE) at Università La Sapienza of Rome, Italy in 1993. Andrea worked for 10 years as high voltage protection engineer for ABB Substation Automation Products in Västerås, Sweden. Since the first years of the IEC 61850 standard, Andrea gave local and remote support in several projects with IEC 61850 implementations for protection and control applications with ABB 670 IEDs, where testing and interoperability issues were encountered. Andrea was part of the International ABB teaching team to spread the knowledge of IEC 61850 worldwide .

Andrea also worked at Programma/Megger as product manager for relay test equipment. He worked on the development of IEC 61850 compatible relay test set and software tools, resulting into patented solutions.

After having worked at STRI AB as technical manager for the Substation Automation Unit, Andrea works now at FMTP AB as technical manager.

Andrea is member of the IEC TC 95 – MT4 technical committee (“Measuring relays and protection equipment”) since 2006. During year 2013 Andrea has received the IEC 1906 Award.

FMTP Power AB

Associated specialists from the Power Industry with knowledge and experience in Protective relays, Smart Grid, IEC 61850, Circuit breakers, battery testing, ...All of them have more than 20 years' experience in Power Industry from the G5 group (ABB, ALSTOM, GE, SCHNEIDER, SIEMENS). They are involved in many standardization activities within IEC since 2002. They are have consulting activities and are organizing worldwide, customer specific Seminars and training courses.

NettedAutomation GmbH – Mr. Karlheinz Schwarz

Our expert, Dipl.-Ing. Karlheinz Schwarz (president of Schwarz Consulting Company, SCC, and owner of NettedAutomation GmbH; Karlsruhe/Germany) specializing in distributed automation systems. He received his Diplom-Ingenieur from University Siegen (Germany) in 1982. He is involved in many international standardization projects (IEC 61850 – utility automation, DER, hydro power, IEC 61400-25 – wind power, IEC 61158 – Fieldbus, ISO 9506 – MMS, ...) since 1984. He is engaged in representing main industry branches in the international standardization of real-time information modelling, configuration, and exchange systems. Core services are consulting and training of utility personal, system integrators, consultants, and vendors. He has educated more than 3.600 experts from more than 800 companies and more than 80 countries. The training courses are considered to be outstanding. Mr. Schwarz is a well-known authority on the application of mainstream information and communication technologies in the utility industry and general automation domain.

FMTP POWER & NETTEDAUTOMATION

Registrations

Prague, Czech Republic, December 8th – 10th
Seminar at the Hotel: HOLIDAY INN Prague Congress Centre

Last Call special fee: of **1.600 Euro** per attendee for 3 days plus taxes if applicable.

It covers access to seminar and trainings, papers & proceeding and includes lunch and coffee breaks.

For contact Registrations & Payment or Travel & Living arrangements

Please contact: registrations@fmtppower.com / +46705750214 or schwarz@scc-online.de /+49721684844
or please contact our Distributor (see the details below)

Distributor

"TMV SS" spol. s r.o.
Studankova 395, 149 00 Praha 4, Czech Republic
Tel.: +420 272 942 720 or +420 602 327 993
Fax.: +420 272 942 722

Additional services offered by FMTP Power and NettedAutomation

We offer also in-house hands-on training courses with protection relays from main manufacturers, test tools, engineering and configuration tools, SCADA solutions, and Gateways between IEC 61850 and IEC 60870-5- and DNP3.

Our in-house hands-on training courses are the most efficient way to speed up and to get exactly what you need:

- focuses on your needs
 - from practice for practice
 - link the standard with your own daily practice
 - exchanging and sharing practical experience
 - no competitors are listening to your plans
 - vendor independent
 - private and confidential questions and answers,
 - no travel time and travel cost for your people
 - we come out to you – all over the world
- The above described 3-days seminar could also be conducted in-house.

Let us know your needs and we will provide you a quote.
